🔗 My Website

PROFILE

I am an aspiring **Mobile Application Developer** with a strong passion for coding and technology. With a solid foundation in **Java, Kotlin, and Dart**, I focus on building **user-friendly Android and cross-platform applications**. I am constantly improving my skills and exploring new tools to enhance my development knowledge, especially in **mobile app architecture and performance optimization**.

Currently, I am working on personal projects using both **Android (Native)** and **Flutter**, applying clean code principles and best practices to deliver **high-quality, efficient applications**.

In addition to development, I am actively expanding my understanding of **UI/UX design principles** to improve the overall user experience. My ultimate goal is to become a proficient **Android & Flutter developer** and contribute to the tech community by creating **innovative and accessible mobile solutions**.

PROFESSIONAL EXPERIENCE

Freelance

03/2024 – Present

Android App developer

- Developed multiple Android apps using **Kotlin** and **Java** tailored to client requirements
- Implemented **MVVM & Clean Architecture** to ensure scalability and maintainability
- Integrated **Room Database, SQLite**, and **Firebase** for offline-first and real-time functionality
- Worked with **Retrofit** for API integration and **Glide/Picasso** for image handling
- Utilized **Jetpack Components** (LiveData, ViewModel, Navigation, WorkManager) to improve app reliability
- Collaborated closely with UI/UX designers to create responsive, pixel-perfect interfaces
- Optimized app performance, reducing load times and memory usage
- Published apps to **Google Play** and handled versioning, crash reports, and timely updates

02/2025 – Present

Flutter Developer

- Developed cross-platform apps with **Flutter & Dart**, ensuring seamless performance on Android and iOS
- Created modern and adaptive UIs using **Material Design, Custom Widgets**, and **Animations**
- Implemented **State Management** solutions such as **Provider, Riverpod**, and **Bloc**
- Integrated REST APIs, Firebase Authentication, Firestore, and push notifications
- Worked with **SQLite** and **Shared Preferences** for local data persistence
- Applied **Responsive Design** to support phones and tablets with different screen sizes
- Collaborated with clients in agile workflows, handling sprints, demos, and feedback iterations
- Followed best practices for clean, reusable, and scalable Flutter codebases
- Experimented with integrating third-party packages and building custom plugins when needed

04/2025 – 05/2025

CodeAlpha

Android Developer Internship

- Designed and developed 3 Android applications: Flashcard Quiz, Random Quote Generator, and Fitness Tracker
- Implemented **MVVM** architecture with **Jetpack components** (**ViewModel**, **LiveData**, **Room Database**) for scalable apps
- Built an interactive Flashcard Quiz App with user performance tracking using **SharedPreferences**
- Developed a Fitness Tracker App with workout logging, goal setting, and progress visualization
- Integrated **SQLite** database and RecyclerView for efficient data storage and display
- Applied **Material Design** principles to create modern, responsive, and engaging UIs
- Practiced clean architecture to ensure maintainable and testable codebases
- Collaborated on version control using **Git & GitHub** for real-world project workflows
- Enhanced problem-solving and debugging skills through hands-on development challenges
- Gained professional experience working within deadlines and delivering production-ready features

SKILLS

Programming Languages:

Java - Kotlin - Dart

Flutter Development:

Flutter SDK

Responsive U

State Management (Provider, Riverpod,Block)

Firebase Integration

Tools & Platforms:

Android Studio

Visual Studio Code

Git/GitHub

Firebase Console

Postman

Soft Skills:

Problem-Solving

Communication

Teamwork

Adaptability

Time Management

Attention to Detail

Continuous Learning

Android Development:

Android SDK,

Jetpack Components (ViewModel, LiveData, Navigation)

Retrofit

Material Design

Gradle

Databases:

SQLite

Room Database

Firebase Firestore & Realtime Database

Other Skills:

Clean Architecture (MVVM, MVI, MVC)

UI/UX Principles

REST APIs

OOP

XML

PROJECTS

Furniture Store - Flutter App

Technologies: Flutter, Dart, Firebase, Provider, Material Design

- Developed a cross-platform **Furniture Store app** for browsing products and managing a shopping cart.
- Implemented **Firebase Firestore** to store product data and user orders in real-time.
- Used **Provider** for state management, ensuring smooth app navigation and cart updates.
- Designed an **intuitive and modern UI** with Material Design principles, including responsive layouts.

- Added features like product filtering, category selection, and real-time cart updates for a seamless shopping experience.

Online Store – Android App

Technologies: Java, Firebase Realtime Database, MVVM, Android Studio, Material Design

- Developed a robust and fully functional e-commerce Android app using **Java** and **Firebase**.
- Applied **MVVM** architecture to achieve a clean separation of concerns between **UI** and business logic.
- Integrated **Firebase Realtime Database** to provide real-time updates for products and shopping cart.
- Crafted a modern, user-friendly interface following **Material Design** guidelines with **XML layouts** and **RecyclerView**.
- Implemented essential features including product catalog, shopping **cart management**, and **secure user authentication**.
- Focused on scalability and maintainability with modular code structure and reusable components.

Travel Ticket Booking - Android App

Technologies: Java, Firebase Realtime Database, MVVM, Android Studio, Material Design

- Developed a dynamic Android **travel ticket booking app** using **Java** and **Firebase**.
- Implemented **MVVM** architecture to ensure a clean, modular, and maintainable codebase.
- Leveraged **Firebase Realtime Database** for real-time synchronization of trips and user data.
- Designed a responsive and modern UI following **Material Design** guidelines with **XML layouts** and **RecyclerView**.
- Built key features including trip browsing, booking cart management, and optional user authentication.
- Optimized for performance and scalability, allowing dynamic data updates without requiring app restarts.

Smart Salary Tracker App

Technologies: Java, Room Database, Android Studio, Material Design

- Developed a flexible time-tracking Android app to monitor daily working hours and calculate overtime automatically.
- Integrated real-time check-in/check-out with automatic timestamp logging.
- Calculated total work duration per day and highlighted any overtime hours.
- Allowed full customization of **working hours**, **base salary**, and **overtime rates**.
- Managed overnight shifts by intelligently splitting time across multiple days.
- Utilized **Room Database** for fast, reliable offline data storage and performance.
- Supported bilingual functionality (**Arabic & English**) for broader accessibility.
- Designed a modern **UI** with smooth navigation, **dark/light themes**, and notification reminders.
- Optimized to assist workers and freelancers in efficiently tracking hours and managing earnings.

Music Player - Android App

Technologies: Java, MVVM, Android Studio, MediaPlayer, Material Design, Android Jetpack

- Developed a modern offline **music player app** with smooth performance and low memory usage.
- Implemented **MVVM** architecture using **ViewModel** and **LiveData** for a responsive and maintainable **UI**.
- Integrated **MediaPlayer** for local music playback with features like shuffle, repeat, and background play.
- Designed an elegant interface with animated album covers, smooth transitions, and **Material Design** components.
- Added **dark mode** support to enhance user experience and accessibility.

Fitness Tracker – Android App

Technologies: Java, SQLite, MVVM, Android Studio, Material Design

- Developed a professional Android app for logging workouts and tracking fitness progress.
- Implemented **SQLite** for secure local storage of workout data and user goals.
- Applied **MVVM** architecture to maintain a clean, modular, and testable codebase.
- Built core features including exercise logging, daily goal setting, and workout history tracking.
- Designed a modern and intuitive **UI** using **Material Design** principles and **XML layouts**.
- Focused on performance, scalability, and user-friendly interaction.

Flashcard Quiz – Android App

Technologies: Java, SharedPreferences, Android Studio, Material Design

- Developed an interactive **flashcard**-based quiz app to help users study and test knowledge.

- Implemented flashcard creation, editing, and deletion with persistent storage using **SharedPreferences**.
- Added quiz mode with randomized questions, score tracking, and progress review.
- Designed a clean and minimal **UI** with **Material Design** components for smooth navigation.
- Optimized performance for responsiveness and ease of use on different devices.

Random Quote Generator – Android App

Technologies: Java, Android Studio, XML UI, Material Design

- Built a simple **Android app** that displays inspirational quotes randomly with each button click.
- Used structured **local storage** for efficient quote management.
- Designed a lightweight and elegant **UI** following **Material Design** principles.
- Integrated features to share or copy quotes with a single tap.
- Ensured smooth performance and responsive interactions across devices.

Happy birthday - Android App

Technologies: Java, Android Studio, Material Design, MediaPlayer, Popup Windows, Animations

- Developed a personalized **Android app** that unlocks only on a specific date to display a customized birthday greeting.
- Integrated **MediaPlayer** and **animations** to create a warm, engaging, and memorable user experience.
- Implemented **popup windows** for interactive and playful **UI** elements.
- Designed a delightful and lightweight interface using **Material Design** and **XML layouts**.

EDUCATION

2020 – 2023

Technical Education Diploma in Decoration
